

KITTERY CONSERVAITON COMMISSION
MINUTES
MARCH 5, 2015

Attending: Steve Hall, Jan Carson, Earldean Wells

Excused: Herb Kingsbury, Karen Saltus, Don Moore

Public Time: Resident Barry Fitzpatrick requested to speak about the amount of pet waste on the trails of Rogers Park – apparently pet owners are under the assumption that the Pet Waste Ordinance is not in effect during the winter months. Will contact Public Works to inquire about getting a sign like the one at Seapoint Beach re. picking up of all pet waste. He also called our attention to an invasive plant that has arrived in Fort Foster.

David Tibbetts, US Fish and Wildlife Service presented his draft outline for his program to prevent the spread of invasive species. He is requesting KCC's help in locating these invasive weeds growing along the road edges in Kittery. He will map these locations and keep Public Works informed so that they will not inadvertently spread these plants while doing their regular maintenance work.

Discussed the February 26, 2015 Planning Board meeting and KCC's need to keep abreast of the Proposed amendments to codify the need to hold pre-construction meeting; update provisions associated with inspections and provide clarity where needed.

Discussed the March 4th meeting on Play Fields Future Plans – of particular interest was the proposed huge field that would encroach on Rogers Park. Deed restriction that Rogers Park remain in natural state for enjoyment of Kittery residents. Next meeting April 8, 2015; 6:30 pm; Recreation Center.

Sensitivity Meeting March 19th, 6:30 pm Town Council Chambers.

Respectfully submitted,

Earldean Wells, Chair.
